

# SHOCK®

## *Injury, Inflammation, and Sepsis: Laboratory and Clinical Approaches*

OFFICIAL JOURNAL OF THE SHOCK SOCIETY, THE EUROPEAN SHOCK SOCIETY, THE INDONESIAN SHOCK SOCIETY, THE INTERNATIONAL FEDERATION OF SHOCK SOCIETIES, AND THE OFFICIAL AND INTERNATIONAL JOURNAL OF THE JAPAN SHOCK SOCIETY

Volume 30, No. 6

December 2008

---

<i>Mark G. Clemens</i>	615	<u>Commentary</u> <b>What's New in <i>Shock</i>, December 2008?</b>
<hr/>		
<i>Ravi Taneja, Ajay P. Sharma, Maurice B. Hallett, George P. Findlay, and M. Rachel Morris</i>	618	<u>Clinical Aspects</u> <b>Immature Circulating Neutrophils in Sepsis Have Impaired Phagocytosis and Calcium Signaling</b>
<i>Axel Nelson, Ingrid Berkestedt, Artur Schmidtchen, Lennart Ljunggren, and Mikael Bodelsson</i>	623	<b>Increased Levels of Glycosaminoglycans During Septic Shock: Relation to Mortality and the Antibacterial Actions of Plasma</b>
<i>Jun-ichi Hirata, Joji Kotani, Michiko Aoyama, Shin-ichiro Kashiwamura, Haruyasu Ueda, Yasuhiro Kuroda, Makoto Usami, Haruki Okamura, and Seishiro Marukawa</i>	628	<b>A Role for IL-18 in Human Neutrophil Apoptosis</b>
<i>Patricia Moubarak, Susanne Zilker, Hilde Wolf, Benjamin Hofner, Thomas Kneib, Helmut Küchenhoff, Karl-Walter Jauch, and Wolfgang H. Hartl</i>	634	<b>Activity-Guided Antithrombin III Therapy in Severe Surgical Sepsis: Efficacy and Safety According to a Retrospective Data Analysis</b>
<i>Yoke Lin Fung, Christopher C. Silliman, Robyn M. Minchinton, Peter Wood, and John F. Fraser</i>	642	<b>Cardiopulmonary Bypass Induces Enduring Alterations to Host Neutrophil Physiology: A Single-Center Longitudinal Observational Study</b>
<i>Mineji Hayakawa, Atsushi Sawamura, Yuichiro Yanagida, Masahiro Sugano, Hirokatsu Hoshino, and Satoshi Gando</i>	649	<b>The Response of Antithrombin III Activity After Supplementation Decreases in Proportion to the Severity of Sepsis and Liver Dysfunction</b>
<hr/>		
<i>Francois Lamontagne, Maureen Meade, Hari Kumar Ondiveeran, Olivier Lesur, and Alison E. Robichaud</i>	653	<u>Basic Science Aspects</u> <b>Nitric Oxide Donors in Sepsis: A Systematic Review of Clinical and <i>In Vivo</i> Preclinical Data</b>
<i>Tim Lahm, Paul R. Crisostomo, Troy A. Markel, Meijing Wang, Yue Wang, Brent Weil, and Daniel R. Meldrum</i>	660	<b>Exogenous Estrogen Rapidly Attenuates Pulmonary Artery Vasoreactivity and Acute Hypoxic Pulmonary Vasoconstriction</b>
<i>Kun-Hung Shen, Cheng-Hsien Lin, Hsiu-Kang Chang, Wei-Chun Chen, and Sheng-Hsien Chen</i>	668	<b>Premarin Can Act Via Estrogen Receptors to Rescue Mice from Heatstroke-Induced Lethality</b>
<i>Branislav Radovancevic, Murat Sargin, Egemen Tuzun, Dong Liu, Vijay S. Patel, Gil Costas, Denise Byler, Dan Tamez, and O. H. Frazier</i>	675	<b>Mechanical Cardiac Assistance Improves Outcome After Prolonged Hemorrhagic Shock</b>
<i>Chirag D. Badami, Maheswari Senthil, Francis J. Caputo, Bobby J. Rupani, Danielle Doucet, Vadim Pisarenko, Da-Zhong Xu, Qi Lu, Rena Feinman, and Edwin A. Deitch</i>	680	<b>Mesenteric Lymph Duct Ligation Improves Survival in a Lethal Shock Model</b>

**COVER:** Apoptosis identification by TUNEL staining in the spleen of an NC, a saline-treated HS mouse (HS + saline), and a Premarin-treated HS mouse (HS + Premarin). The animals were killed at 4 h after the termination of 1-h heat exposure or the equivalent time for the NC. See Shen et al., pages 668–674, 2008
