COVER: Porcine cardiac perfusion (Tc MIBI SPECT) at rest (baseline) and 6 h after spontaneous circulation. (A): Myocardial perfusion imaging before cardiac arrest; (B): Myocardial perfusion imaging of the saline group after resuscitation; (C): Myocardial perfusion imaging of Shen-Fu injection group at 6 h after resuscitation. The bright areas indicate blood flow. See Ji et al., pages 530–536, 2011.
